

# Pest Control Inspection Checklist

# Fall Protection Site Safety Inspection Report Form:

## Instructions:

- Ensure that you conduct the inspection thoroughly and mark each item appropriately.
- For any non-compliant items, immediate corrective action should be taken. Record any observations or necessary corrective actions in the sections provided.
- Ensure that both the inspector and site supervisor sign off on the report to confirm acknowledgment.

## Site Details

Site Name: \_\_\_\_\_

Site Address: \_\_\_\_\_

Site Supervisor: \_\_\_\_\_

Date of Inspection: \_\_\_ / \_\_\_ / \_\_\_\_\_

Time of Inspection: \_\_\_\_\_ AM/PM

## Inspection Conducted By

Name: \_\_\_\_\_

Title: \_\_\_\_\_

Contact Number: \_\_\_\_\_

## Fall Protection Equipment:

[ ] **Harnesses and Lanyards:** Check if workers have access to appropriate harnesses and lanyards.

[ ] **Guardrails:** Verify the presence and integrity of guardrails on elevated work surfaces.

[ ] **Safety Nets:** Assess the condition and installation of safety nets, if used.

### Anchor Points:

- Identification:** Ensure that anchor points are clearly identified and accessible.
- Attachment Strength:** Verify the strength and stability of anchor points.
- Spacing:** Check the spacing of anchor points to ensure adequate coverage.

### Fall Protection Training:

- Worker Training:** Confirm that workers using fall protection equipment are trained in its use.
- Records:** Ensure that training records are maintained and up to date.

### Fall Hazard Identification:

- Hazard Assessment:** Assess the site for fall hazards and document findings.
- Hazard Mitigation:** Identify measures in place to mitigate fall hazards.

### Inspection of Equipment:

- Harnesses and Lanyards:** Inspect the condition of harnesses and lanyards in use.
- Connectors:** Check connectors, hooks, and carabiners for damage or wear.
- Lifelines:** Inspect lifelines and ropes for integrity and proper anchoring.

### Fall Arrest Systems:

- Shock Absorbers:** Verify the condition of shock absorbers on lanyards.
- Self-Retracting Lifelines:** Inspect self-retracting lifelines for proper functioning.
- Rescue Plan:** Confirm the availability and effectiveness of a rescue plan.

### Fall Protection Barriers:

- Guardrails:** Check guardrails for stability and adequate height.
- Safety Nets:** Inspect safety nets for proper installation and condition.

### Fall Protection Procedures:

- Review Procedures:** Ensure that workers are following established fall protection procedures.
- Emergency Response:** Verify the availability and effectiveness of emergency response procedures.

### Recommendations and Corrective Actions:

- Identify Issues:** Document any issues, hazards, or non-compliance observed during the inspection.
- Corrective Actions:** Recommend corrective actions to address identified issues.

Conclusion:

- [ ] **Inspection Summary:** Summarize the inspection findings and any recommended actions.
- [ ] **Inspector's Signature:** The inspector should sign and date the report.

Task Review:

- [ ] **Verify Completed Tasks:** Review the form to ensure all inspection tasks are addressed.
- [ ] **Update Inspection Records:** Update inspection records based on findings and actions taken.

Observations/Comments:
